<b>W</b>	<b>ENDING SHELTER COUNT (date)</b>	<b>46</b>	<b>59</b>	<b>105</b>

In a perfect world, the Ending Count is equal to the Beginning Count (A) plus Total Intake

(F) minus all Outcomes (R+V). -----> 50 53 103

If your reported Ending Count does not match these numbers, please go back through your data and be sure you didn't miss something (i.e., animals in foster, adoptions, transfers, etc.). If all animals have been accounted for and the reported Ending Count is different, please indicate in the comment section.

#### COMMENTS:

These figures were computed after running various chameleon reports. They are not 100% accurate but are closer than the estimate used last year. Data is not captured in the detail needed for 100% accuracy. There was no beginning number to use so the ending shelter count is off.

**I agree that in completing this form, we have used the Maddie's Fund definitions of “Healthy,” “Treatable - Manageable,” “Treatable - Rehabilitatable,” and “Unhealthy & Untreatable” as set forth in the attached document titled, “Maddie’s Fund® Categorizations/Definitions of Shelter Animals.”**
